

Laser Genesis

What to expect:

- You may experience mild redness & swelling post treatment, this is normal and usually subsides within a few days.

Post-care Instructions

- Avoid the sun/tanning beds. UV exposure may increase the risk of side effects and adverse events.
- Use a cold face towel to cool the treatment area if required. Avoid ice packs used directly on the skin surface.
- Avoid excessive heat for 2days (hottubs/ sauna)
- Avoid skin irritants for 2days (e.g. products containing tretinoin, retinol, steroids, benzoylperoxide, glycolic/salicylic acids, astringents)
